

YOUR LOVED ONE DESERVES A NURSING HOME WHERE
A DOCTOR IS ALWAYS AVAILABLE.

Welcome To Marquis Health Services[®], Partnered With TeleHealth Solution

Marquis Health Services[®] has always maintained a commitment to providing the highest quality of patient care in a safe and comfortable environment—and now we offer quality, around-the-clock physician care, too. You no longer have to worry about urgent and emergency medical scenarios. **TeleHealth Solution**, a telemedicine company, will help provide **24/7 medical care** for our residents.

Marquis Health Services[®] has partnered with TeleHealth Solution to provide residents with the best care possible:

Experienced, board-certified doctors on-demand, who can provide residents with virtual medical evaluations in urgent and emergency situations. Our goal is preventing unnecessary transfers with ambulance rides, waiting in emergency rooms, and extra expenses. Medical exams will be performed **"in-facility"** where patients can remain comfortable in a familiar environment.

When a patient has an urgent medical need, the nurse simply calls our round-the-clock hospitalists.

When Virtual evaluation is necessary, doctors connect to the staff and the patient by high-definition audio and video.

The doctors guide staff through an examination, assessing patients with a 12-lead ECG, virtual stethoscope, and many other tools.

TeleHealth Solution's doctors can **order additional labs and tests** to reach a proper diagnosis, treating many medical conditions **without a trip to the Emergency Room.**
